Performance	<p>What one actually does, in practice. Performance is based on one’s competence but is modified by system factors and the circumstances.</p>
Professional Practice Gap	<p>The difference between actual and ideal performance and/or patient outcomes.</p> <p>In patient care, the quality gap is “the difference between present treatment success rates and those thought to be achievable using best practice guidelines.” <small>Closing the Quality Gap: A Critical Analysis of Quality Improvement Strategies. Fact Sheet. AHRQ Publication No. 04-P014, March 2004. Agency for Healthcare Research and Quality, Rockville, MD http://www.ahrq.gov/clinic/epc/qqapfact.htm</small></p> <p>As CME content goes beyond issues of direct patient care the ACCME is using professional practice gap to refer to a quality gap in areas that include but also can go beyond patient care (e.g., systems’ base practice, informatics, leadership and administration)</p>

Scope of Practice

The range or breadth of a physician's actions, procedures, and processes.

"...those health care services a physician or other health care practitioner is authorized to perform by virtue of professional license, registration, or certification."

Assessing Scope of Practice in Health Care Delivery: Critical Questions in Assuring Public Access and Safety, Federation of State Medical Boards, 2005.

"Scope of practice: Definition of the rules, the regulations, and the boundaries within which a fully qualified practitioner, with substantial and appropriate training, knowledge, and experience may practice in a field of medicine or surgery, or other specifically defined field. Such practice is also governed by requirements for continuing education and professional accountability."
